

Senior Carbon Specialist (Consultant)

My Emissions is a fast-growing, Innovate UK backed start-up that helps food companies to measure and reduce their carbon footprint, and display our simple food carbon label.

Food is responsible for at least 25% of all global greenhouse gas emissions (with some estimates as high as 37%). It's one of the easiest and most important areas to reduce our impact on the planet.

Starting in 2020, our simple and data-driven process, combined with affordable pricing, means we already work with some of the largest food companies in the world.

We're now hiring a Senior Carbon Specialist (Consultant) to lead our calculation strategy and work with larger (and more complex) clients.

Working directly with our founders, data research and client teams, your role will include:

- **Delivering high priority carbon assessments.** You will work with My Emissions' larger clients (including major food companies) to measure their carbon footprint and help them identify ways to reduce their impact.
- **Automating and scaling our calculations.** Helping to integrate our calculation process into our brand new, dedicated platform, and create a system that can scale.
- **Long-term strategy and calculation improvements.** Liaising with our existing data, client and tech teams to set the long-term strategy for our calculations.

Over time, you will help to grow the team and take ownership of the My Emissions calculation process.

What we are looking for

- Demonstrable experience with and understanding of the GHG Protocol, Carbon Accounting, and/or Life Cycle Assessments. Prior work with food companies is an advantage.
- Clear and effective communication skills, with experience working with multiple internal and external stakeholders.
- Technical and data-driven mindset, with an ability to engage with our technical teams to automate our calculations.
- You must have the right to work in the UK for this role.
- Outstanding attention to detail.

What you will get as our Senior Carbon Specialist (Consultant)

- Competitive salary (depending on experience).
- Work for a purpose-driven company.
- **Flexible** working arrangement. Most of our team work hybrid, between their home and our London (Liverpool Street) office.
- Holiday purchase scheme, up to 36 days.
- All team members offered shares through our EMI Options Scheme.
- Fun working environment, with regular socials and team events.

About My Emissions

My Emissions was started by two friends, Matt and Nathan during the covid-19 pandemic. They wanted to help people reduce their carbon footprint, and identified food as one of the best and easiest ways to do this.

Over the past 2 years, My Emissions has developed and launched a simple carbon label. Now, people can easily see the carbon footprint of their food, and companies can understand and reduce their impact at an affordable price.

My Emissions is backed by industry investors, has received funding from Innovate UK, and been recognised in the FoodTech 500.
